After a password change, use this guide to update your devices where needed.
This guide applies to Mac Operating systems that are connected to the University network.

**Keychain**
IT Services recommend updating your keychain settings when prompted at login.

- Select the **Update Keychain** Password option
- When prompted, enter your previous password

If you are unable to update your keychain settings at login, complete the following steps on the next page to avoid constant password prompts.
Mac Operating System

This guide applies to Mac Operating systems that are connected to the University network.

Keychain

- Open Applications
- Open Utilities
- Select Keychain Access
- In the Keychain menu, select Edit
- Click Change Password for Keychain ‘Login’
- Enter in your previous password within the Current Password section
- Enter your new password within the New Password and Verify section(s)
- Click OK

- You have successfully updated your password for this service.
Mac Operating System

This guide applies to Mac Operating systems that are private or unmanaged by IT Services.

Eduroam

- Open System Preferences
- Go to Network Preferences
- Select the WiFi adapter
- Click the Advanced button
- Select Eduroam from the list of saved wireless networks
- Click on the – button to remove Eduroam and then click OK

You have successfully updated your password for this service.
