

## EndNote and Ebscohost databases

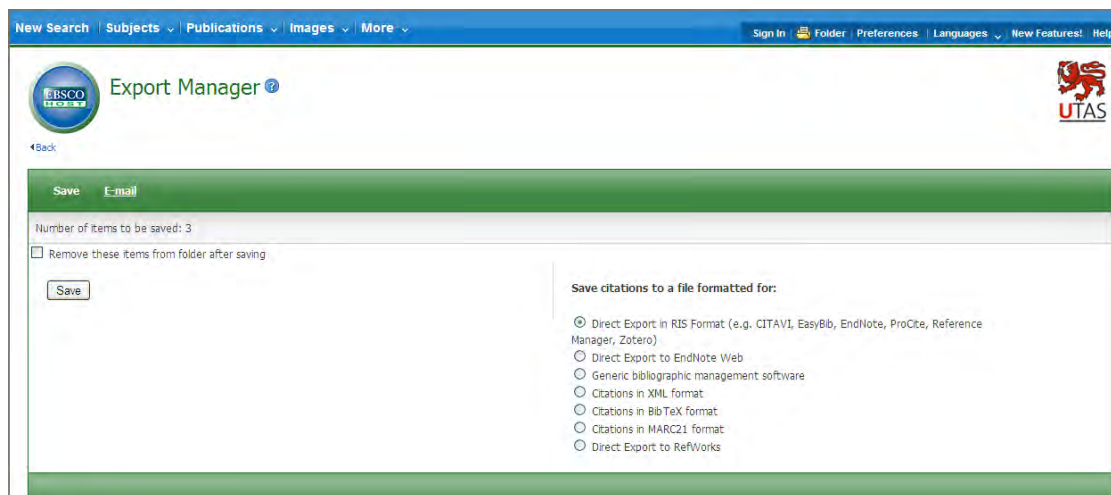

Importing records from Ebscohost databases can be done directly without the need for an EndNote filter. Although some Ebsco databases have fulltext articles, only brief citations will be loaded into your EndNote library.

### From the Ebscohost database...

- Perform a search.
- Mark the citations you want to save by clicking the **Add to Folder** link against each desired citation
- In the 'Folder has items' window on the top right hand pane, click 'Go to Folder View'
- On the *Folder contents* screen, select the citations you want exported to your EndNote library by clicking the **Select/Deselect All** checkbox, or by clicking individual checkboxes

- Click on the **Export** icon
- On the *Export manager* screen, click the button for **Direct Export in RIS Format** (e.g. CITAVI, EasyBib, EndNote, ProCite, Reference Manager, Zotero)
- Click **Save** button

- Your database records should now be loaded into the EndNote library you have open. If you don't have an EndNote library open, records will be loaded into the library you last had open.

Always check and correct the imported citations as editing may be required.
