School of Medicine Short Course Program
Applied Surgical Anatomy: Brain and Spinal Chord Regions

This intensive workshop has been designed to offer SET Trainees (or those considering SET application) the opportunity to expand and consolidate their surgical anatomy knowledge base in relation to operative procedures whilst preparing for Part 1 and 2 Examinations.

**Workshop content**

Attendees will have the opportunity to participate in a combination of interactive small group skill stations to explore brain and spinal cord anatomy in relation to surgical procedures. A combination of dynamic and still intraoperative images, radiological exhibits and prospected human cadavers will be used to facilitate learning.

**Facilitators**

- Mr. Albert Erasmus, Neurosurgeon – Head of Department Neurosurgery, RHH
- Mr. Arvind Dubey, Neurosurgeon
- Mr. Jens Peters-Willke, Neurosurgeon
- Mr. Nova Thani, Neurosurgeon
