Discipline of Information and Communication Technology

Unit Outline

KXC362 Computer Security

September 2014 - January 2015
Hangzhou, China

Unit Coordinator
Dr. Joel Scanlan
E-Mail: Joel.Scanlan@utas.edu.au
Phone: (03) 6226 7825
Room: Cent 469, Sandy Bay Campus, Hobart

Lecturing Staff
Dr Fuli WU
UNIT OVERVIEW

Introduction

This unit aims to introduce students to the principles behind the techniques and strategies that can be used to keep computer systems at a desired level of security. It is designed to alert anyone who might have responsibility for a computer system to the security issues that they should consider and equip them with an understanding of how to establish the threats that they might face and the ability to evaluate the techniques that they can use to counter these threats.

These techniques include threat and risk analysis, the characteristics of encryption algorithms and how to use these to achieve particular security goals, authentication techniques, operating system and network security, Internet security and associated protocols, concluding with business continuity planning.

Prerequisites

KXC151

Unit Weight

12.5% of one academic year

Learning expectations

The University is committed to high standards of professional conduct in all activities, and holds its commitment and responsibilities to its students as being of paramount importance. Likewise, it holds expectations about the responsibilities students have as they pursue their studies within the special environment the University offers. The University's Code of Conduct for Teaching and Learning states: Students are expected to participate actively and positively in the teaching/learning environment. They must attend classes when and as required, strive to maintain steady progress within the subject or unit framework, comply with workload expectations, and submit required work on time.

Attendance/performance requirements and teaching and learning strategies

No attendance/performance requirements specified.

Communication

No communication specified.

Teaching Pattern

Lectures: 3 hr/wk
Tutorials: 1 hr/wk

Unit Content

The following list provides an indication of the topics which will be covered in the unit.

1. Overview of unit content and introductory concepts
2. Threats, Risk Analysis and Security policies
3. Established Business Techniques
4. Physical Access Control
5. Authentication and Logical Access Control
6. Cryptography and cryptographic algorithms
7. Using cryptographic algorithms to achieve security goals
8. SNMPv3
9. Kerberos
10. Digital signatures
11. Security in Operating systems
12. Security standards
13. Network Security
14. Firewalls
15. Intrusion Detection
16. Security Goals for eCommerce
17. Public Key Ownership and PKI
18. Business Continuity Planning

For more information see the section titled 'Content' on the unit website.
Learning Outcomes

On successful completion of this unit, you will be able to:

1. Analyse the threats and vulnerabilities in computer systems and evaluate countermeasures
2. Use the principles and justify the application of security countermeasures such as policies, physical security, access control, cryptography, operating system security and network security techniques
3. Evaluate the various protocols for electronic authentication of identity
4. Explain the process of creating a business continuity plan
5. Work in a team to research and produce a solution to a problem concerning a computer security technique, application or problem

Generic graduate attributes

Successful completion of this unit supports your development of course learning outcomes, which describe what a graduate of a course knows, understands and is able to do. The course learning outcomes for all the ICT degrees can be found via: http://www.utas.edu.au/ict/new-courses. Course learning outcomes are developed with reference to national discipline standards, Australian Qualifications Framework (AQF), any professional accreditation requirements and the University of Tasmania’s Graduate Quality Statement.

The University of Tasmania experience unlocks the potential of individuals. Our graduates are equipped and inspired to shape and respond to the opportunities and challenges of the future as accomplished communicators, highly regarded professionals and culturally competent citizens in local, national, and global society. University of Tasmania graduates acquire subject and multidisciplinary knowledge and skills and develop creative and critical literacies and skills of inquiry. Our graduates recognise and critically evaluate issues of social responsibility, ethical conduct and sustainability. Through respect for diversity and by working in individual and collaborative ways, our graduates reflect the values of the University of Tasmania.

In this unit these skills are specifically targeted:

Knowledge: Students will have the opportunity to apply their technical and information skills and learn co-operatively by working together in the assignment case study.

Communication Skills: Students will further develop their communication skills and ability to write reports by giving presentations in tutorials and submitting a written tender proposal.

Problem-solving skills: Students will be required to conceptualise problems and formulate a range of solutions by working effectively with others to produce a written tender proposal.

Social Responsibility: Students will learn to acknowledge the social and ethical implications of their actions by examining the results of hacking and computer fraud.

Alterations to the unit as a result of student feedback
UNIT ASSESSMENT

Assessment Pattern

Internal (30%), Exam (70%)

Assessment Summary

<table>
<thead>
<tr>
<th>Component</th>
<th>Weight</th>
<th>Due Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>Assignment 1 - Cuckoo's Egg Analysis</td>
<td>10%</td>
<td>Week 7 - Thursday 30th of October at 3:00 pm</td>
</tr>
<tr>
<td>Assignment 2 - Tender Proposal for a Case Study</td>
<td>20%</td>
<td>Week 13 Thursday the 11th of December at 3:00pm</td>
</tr>
<tr>
<td>Formal Examination</td>
<td>70%</td>
<td>The final exam is conducted by the University of Tasmania's Student Centre in the formal examination period. AIEN's Teaching and Learning Administration Office will provide you with the specific date, time and location of your exam.</td>
</tr>
</tbody>
</table>

Assessment Items

**Item 1**

Title: Assignment 1 - Cuckoo's Egg Analysis  
Type: In-Semester - individual assignment  
Task Length: To Be Advised  
Weighting: 10%  
Links to Learning Outcomes: 1, 2  
Due: Week 7 - Thursday 30th of October at 3:00 pm  
How To submit:  
Description: This assignment requires you to read the book 'The Cuckoo's Egg'. There may be an opportunity for approved students to undertake an alternative assessment task to replace reading the book.

**Item 2**

Title: Assignment 2 - Tender Proposal for a Case Study  
Type: In-Semester - group assignment  
Task Length: not applicable  
Weighting: 20%  
Links to Learning Outcomes: 1, 2, 3, 4, 5  
Due: Week 13 Thursday the 11th of December at 3:00pm  
How To submit:  
Description: This assignment is a group assignment. It requires you to work steadily during semester, beginning with the second tutorial. Tutorials 2, 3, 4, 7, 8, and 10 provide you with an opportunity to develop and obtain feedback on your ideas for the content of this assignment.

**Item 3**

Title: Formal Examination  
Type: Formal Examination  
Task Length: 3 hours  
Weighting: 70%  
Links to Learning Outcomes: 1, 2, 3, 4  
Due:  
The final exam is conducted by the University of Tasmania's Student Centre in the formal examination period. AIEN's Teaching and Learning Administration Office will provide you with the specific date, time and location of your exam.  

Description: Students are allowed to take two A4 sides of handwritten notes into the exam. These notes are handed in with the exam paper.

See the 'Assessment' section in unit website for more detailed information about assessment items.

How your Final Grade will be determined

Overall assessment will be based on the student's performance throughout the semester as well as in a formal examination. In order to achieve a pass (or better) result, a student must obtain:

1. at least 45% of the total mark for in-semester assessment items  
2. at least 45% of the mark for the formal examination  
3. at least 50% of the overall mark

Attendance Requirements
It is a requirement of your Chinese university that you attend all classes. UTAS supports this principle. It is our belief that attendance in class leads to better engagement with the subject matter and therefore to better results. Please attend all classes.
UNIT RESOURCES

Unit Web Site

This unit is Web Supplemented. This means that the use of the Web is optional for this unit. The unit website contains unit information and resources. The unit website is accessed from http://www.utas.edu.au/coursesonline/. You will need to use your University of Tasmania email pop account username and password to log on to the MyLO system. Once authenticated by the system your personalised MyLO Learning Online area will be displayed. It contains links to the websites that you have permission to access - including the website for this unit. If you are not able to access the unit website, please contact the technical staff at ZUT.

Prescribed Text

Readings

A list of readings referred to in the lecture slides can be found on the unit website in the resources area. The reference list is intended as a resource to help you with understanding the unit content when you need some extra explanations, or material for an assignment.

I have added my comments about the strengths of each book. For example:

Gollmann, D. 2000, Computer Security, John Wiley and Sons
[especially good on operating system security and access control]

Software

The software that you will need to access the unit website and to study this unit, including general purpose software such as word processors, is provided on the computers in the computing labs. If you intend to use software on other computers please check that the versions are compatible. You will be using the email security software called PGP - Pretty Good Privacy for one tutorial in this unit. A copy of the freeware version is provided on CD.
GENERAL RESOURCES

School Website

Faculty Website

Information and Resources for Faculty of Science, Engineering and Technology students are available on the faculty website at: http://www.utas.edu.au/scieng

University Website

Information and Resources for 'Current Students' are available on the university website at: http://www.utas.edu.au/students/

School Help Desk

Contact technical staff at ZUT for information about accessing and using the Computer labs.
GENERAL ASSESSMENT

Approach to Learning

The University is committed to high standards of professional conduct in all activities, and holds its commitment and responsibilities to its students as being of paramount importance. Likewise, it holds expectations about the responsibilities students have as they pursue their studies within the special environment the University offers.

The University's Code of Conduct for Teaching and Learning states:

Students are expected to participate actively and positively in the teaching/learning environment. They must attend classes when and as required, strive to maintain steady progress within the subject or unit framework, comply with workload expectations, and submit required work on time.

You are expected to spend about 130 hrs studying in this unit - this includes attendance at scheduled teaching sessions. (For a 13 week semester this is, on average, 10 hr/wk.) This is the amount of study time that the 'typical' student will need to reach the level of competence and understanding required to fulfil the unit objectives. You are expected to:

- attend all scheduled teaching sessions, unless otherwise notified by the unit coordinator
- prepare for, and actively participate in all scheduled teaching sessions
- complete the assigned learning tasks
- review what has been learnt
- complete assessment items and submit them on time
- access and be familiar with the information and resources available on the unit website
- seek help from teaching staff if you have any questions or difficulties in studying this unit

You are encouraged to read the university's Code of Conduct for Teaching and Learning. Part A describes the 'Responsibility of the University to Students' and part B describes the 'Responsibilities of Students to the University'.

It is expected that students will familiarise themselves with access and use of the MyLO system operated by the University for the electronic delivery of course materials, and for various forms of communication.

It is expected that students will consult email sent to their University email address at least twice a week for notices relating to the administration of the unit, and for notification of the results of assignments.

It is expected that students will read the background material specified in the course curriculum, will actively attend and participate in tutorials, and be prepared to discuss relevant issues arising with tutors, lecturers and fellow students.

Student Expectations of the Unit

Students enrolled in this Unit may reasonably expect the following:

1. To be able to contact a lecturer or tutor by electronic mail, to raise issues arising in the unit, either relating to content or student performance within the unit.
2. Subject to availability, to be able to discuss such issues in person with the lecturer or tutor.
3. That assignments will be marked and the marks will normally be returned within 3 weeks of due dates.
4. That all relevant notices regarding the administration of the unit, including any necessary changes, will be communicated to all students enrolled in the unit via email.

These expectations are in addition to those specified in relevant University regulations.
Plagiarism

In your written work you will need to support your ideas by referring to scholarly literature, works of art and/or inventions. It is important that you understand how to correctly refer to the work of others, and how to maintain academic integrity. Failure to appropriately acknowledge the ideas of others constitutes academic dishonesty (plagiarism), a matter considered by the University of Tasmania as a serious offence.

Unless specifically stated in the specification of the assessment item provided on the unit website, it is required that:

- work submitted by a student is the work of that student alone OR
- where the assessment item is to be completed by a group of students, the work submitted by the group of students is the work of that group of students alone.

While students are encouraged to discuss the assignments in this unit and to engage in active learning from each other, it is important that they are also aware of the University's policy on plagiarism. Plagiarism is taking and using someone else's thoughts, writings or inventions and representing them as your own; for example downloading an essay wholly or in part from the internet, copying another student's work or using an author's words or ideas without citing the source.

"Plagiarism is a form of cheating. It is taking and using someone else's thoughts, writings or inventions and representing them as your own; for example, using an author's words without putting them in quotation marks and citing the source, using an author's ideas without proper acknowledgment and citation, copying another student's work.

If you have any doubts about how to refer to the work of others in your assignments, please consult your lecturer or tutor for relevant referencing guidelines. You may also find the Academic Honesty site on MyLO of some assistance.

The intentional copying of someone else's work as one's own is a serious offence punishable by penalties that may range from a fine or deduction/cancellation of marks and, in the most serious of cases, to exclusion from a unit, a course or the University. Details of penalties that can be imposed are available in the Ordinance of Student Discipline - Part 3 Academic Misconduct, see [http://www.utas.edu.au/__data/assets/pdf_file/0006/23991/ord91.pdf](http://www.utas.edu.au/__data/assets/pdf_file/0006/23991/ord91.pdf).

The University and any persons authorised by the University may submit your assessable works to a plagiarism checking service, to obtain a report on possible instances of plagiarism. Assessable works may also be included in a reference database. It is a condition of this arrangement that the original author's permission is required before a work within the database can be viewed."

It is important that you understand this statement on plagiarism. Should you require clarification please see your unit coordinator or lecturer. Useful resources on academic integrity, including what it is and how to maintain it, are also available at: [http://www.academicintegrity.utas.edu.au](http://www.academicintegrity.utas.edu.au)

Academic misconduct

Academic misconduct includes cheating, plagiarism, allowing another student to copy work for an assignment or an examination, and any other conduct by which a student:

a. seeks to gain, for themselves or for any other person, any academic advantage or advancement to which they or that other person are not entitled; or

b. improperly disadvantages any other student.

Students engaging in any form of academic misconduct may be dealt with under the Ordinance of Student Discipline, and this can include imposition of penalties that range from a deduction/cancellation of marks to exclusion from a unit or the University. Details of penalties that can be imposed are available in Ordinance 9: Student Discipline [http://www.utas.edu.au/__data/assets/pdf_file/0006/23991/Ordinance-9-Student-Discipline.pdf](http://www.utas.edu.au/__data/assets/pdf_file/0006/23991/Ordinance-9-Student-Discipline.pdf) - Part 3 Academic Misconduct.

Referencing

The preferred text referencing systems for the School is the Harvard system (also referred to as the author-date system). In your written work you will need to support your ideas by referring to scholarly literature, works of art and/or inventions. The University library provides information on presentation of assignments, including referencing styles and should be referred to when completing tasks in this unit. For information on presentation of assignments,
It is important that you understand how to correctly refer to the work of others and maintain academic integrity. Failure to appropriately acknowledge the ideas of others constitutes academic dishonesty (plagiarism), a matter considered by the University of Tasmania as a serious offence. The university document on plagiarism contains information about referencing the work or ideas of others (see [http://www.utas.edu.au/plagiarism/](http://www.utas.edu.au/plagiarism/)).
Submissions
The details of the submission method (paper, electronic or other) for each assignment will be supplied in a separate assignment specification sheet. All in-semester assignment submissions (including electronic submissions) are to include an Assignment Cover Sheet which includes a statement confirming that the submission is your own work. If this undertaking is not signed, the assignment will not be marked. The Assignment Cover Sheet is available on the Discipline's web site http://www.utas.edu.au/ict/resources.

Extensions
Assessment items will not be accepted after the due date except under the conditions stated in the Discipline policy on late assessment. http://www.utas.edu.au/__data/assets/pdf_file/0003/231960/ExtensionPolicy.pdf (PDF - 100KB).

Review of Assessment and Appeals
1. It is expected that students will adhere to the following policy for review of any piece of continuous assessment.
   a. Within 5 days of the release of the assessment result, the student should request an appointment with the Lecturer. The student should be prepared to discuss specifically which section of the marking criteria they are disputing and why they consider the mark is inappropriate.
   b. Following this discussion, students may request a formal remark of the original submission (in accordance with Rule of Academic Assessment 111, clause 22.1). This remark will be undertaken, where practicable, by an alternative assessor.
2. Students may also request a review of the final result in a unit. The request and payment must be made within 10 days from the date of the result notification. Students are referred to Rule of Academic Assessment 111, clause 23 at http://www.utas.edu.au/university-council/university-governance/rules and http://www.studentcentre.utas.edu.au/examinations_and_results/results/result_review_results.htm.

Complaints Procedure
It is expected that students will adhere to the following policy for making any complaint or grievance directly related to a Unit:
   a. In the first instance, students are to approach the Lecturer or Unit Coordinator concerned and arrange a time to speak with them about their concern.
   b. If an issue remains unresolved, the student should approach the Head of School and arrange a time to speak with them about their concern.

If the School's internal policy of complaints is unable to resolve an issue, students should consult Ordinance 8 Student Complaints for further direction, see http://acserv.admin.utas.edu.au/complaints_info.html.

Formal Examination
The formal examination will be held at ZUT, Hangzhou, and is conducted by the University Registrar.

Final Grade
Passing grades will be awarded based on the AVCC guidelines:

- PP at least 50% of the overall mark but less than 60%
- CR at least 60% of the overall mark but less than 70%
- DN at least 70% of the overall mark but less than 80%
- HD at least 80% of the overall mark

In order to comply with the benchmarks set by the Faculty of Science, Engineering & Technology for distribution of grades in units, both the in-semester and examination marks that students obtain may be adjusted either upwards or downwards. See http://fcms.its.utas.edu.au/scieng/scieng/policies.asp for details of the Faculty Assessment Guidelines.

Further information and assistance
If you are experiencing difficulties with your studies or assignments, have personal or life-planning issues, disability or illness which may affect your course of study, you are advised to raise these with the unit coordinator in the first instance.

There is a range of University-wide support services available to you including Student Learning Support (http://www.utas.edu.au/student-learning/), Student Advisers (http://www.utas.edu.au/first-year/student-advisers), Disability Services (http://www.utas.edu.au/students/disability/students), and more which can be found on the Student Support and Development page (http://www.utas.edu.au/students/students/support-development) of the University website.
Should you require assistance in accessing the Library, visit their website (http://www.utas.edu.au/library/study) for more information.
