Big Idea 3

Learning Activity 2

Questions:

1. In general, was 1890 a wetter year than 2013 on Bruny Island? Use details from the graph to justify your answer.
2. Which months of the year support your conclusion?
3. What months of the year contradict your conclusion?

Answers:

1. Yes 1890 was a wetter year than 2013 on Bruny Island.
2. The heavy rainfall in June, August and October of 1890 contribute to this being a wetter year.
3. May and September were wetter in 2013 than in 1890 and this contradicts the conclusion.
