DO NOT use this machine unless you have been trained in its safe use and operation.

Description of Work: Using an Air Compressor

Potential Hazards: Electrical and compression hazard with the potential to cause harm through exposure to impact and cutting, noise and compressed air.

Personal Protective Equipment (PPE) Required (Check the box for required PPE):

- Gloves
- Face Masks
- Eye Protection
- Welding Mask
- Appropriate Footwear
- Hearing Protection
- Protective Clothing

Safe Work Checklist:

1. PRE-Operation:
   - Task (e.g. Drawings, instructions, specifications etc) is clearly understood.
   - Ensure appropriate guarding is in place.
   - Ensure release valve is clean and free from obstruction.
   - Lock the wheels to prevent movement.
   - Check all fittings are securely connected prior to being pressurised.
   - Identify ON/OFF switch.

2. Operation:
   - Only use as per directions in User Manual
   - Start compressor noting pressure increase and cut out/cut in pressure.
   - Do not kink or squash the hose.
   - Listen for any air leaks when using the compressor and report these immediately.
   - Check the compressor pressure at regular intervals.
   - Release the pressure in hose prior to uncoupling.

3. POST-Operation:
   - Release the pressure from the hose and vessel.
   - Store air hose off the ground to prevent contamination from dirt.
   - Return air tools to their storage area.
### Competent Persons

(The following persons are authorised to operate the equipment).
