## Course Delivery

The course will be delivered using MyLO, UTas’ on-line teaching and learning system, which is accessible via the internet at [http://www.utas.edu.au/learning-teaching-online/](http://www.utas.edu.au/learning-teaching-online/).

The study program will consist of self-study modules linked to a textbook, and will focus on the fundamentals of chemistry.

Continuous on-line testing and feedback via self-test questions, weekly assignments and tutorials will enable you to monitor your progress.

Laboratory sessions will be held on the Hobart and Launceston campuses over two days at the end of semester to familiarise students with fundamental laboratory operations.

## Course Format

A 7 week on-line format plus compulsory laboratory classes (2 days) during the second week of February.

The laboratory classes will be held on the Sandy Bay Campus (Hobart) and Newnham Campus (Launceston).

## Study Time

Depending upon your chemistry background you will need to allow 80 - 100 hrs of study time for this unit.

## Assessment

The assessment of the unit will include marks obtained from laboratory classes, weekly assignments, and the end of course examination.

## Prescribed Text

The prescribed text is available through Co-op Bookshops located on the Sandy Bay and Newnham campuses or on-line at: [http://www.coop-bookshop.com.au](http://www.coop-bookshop.com.au)

## Laboratories

Two days in the second week of February. Dates and times to be advised via email and MyLO by the Unit Coordinator.
Withdrawal

If you do not intend to proceed with the course at any time please contact the Student Centre to arrange your immediate withdrawal. This may also be done on-line if you have an existing enrolment and UTAS log-in.
