Bachelor of Nursing
3 year & 2 year fast-track
H3D, H3H, H3R, H3V

Nursing is more than a job. It’s a calling. So if you’ve heard that call and are ready to make a difference as an invaluable part of the healthcare system, this course will help you do it.

What you will learn

About this course
Over the six semesters of study whether you enrol in the three-year course or two year fast-track program, you will develop the knowledge and skills – and perhaps most importantly, the attitude – needed to offer the highest quality health care (outlined in the National Competency Standards for the Registered Nurse, ANMC, 2006). You will learn the best practices for restoring and maintaining people’s health, preventing disease, and working as part of a multi-disciplinary team of healthcare professionals.

Supported by a well-equipped simulated learning environment on campus, during the course you’ll be given the opportunity to undertake work placements in both rural and metropolitan health care facilities.

Where it can take you

Career outcomes
Once you’ve completed the course, there are plenty of opportunities for further study – including Honours, Graduate Certificate, Graduate Diploma, Clinical Masters, Masters and PhD.

If you’re heading straight into the world of nursing, you’ll be doing so with an internationally regarded degree. This means you could find work in public and private hospitals, as well as aged care, community health, general practice, the defence force, and primary health care.

Professional recognition
As an accredited course, once you graduate from this program you will have the knowledge and practical skills to register as a graduate nurse in Australia with the Australian Health Practitioner Regulation Agency (AHPRA).

For more information on AHPRA head to www.ahpra.gov.au

In Launceston you will study two semesters per year across 3 years, while in Hobart, Rozelle NSW and Darlinghurst NSW it is fast-tracked and you will study three semesters per year in only 2 years.

*Study of the Bachelor of Nursing course at Rozelle NSW and Darlinghurst NSW is not currently available to international applicants.
Make it happen
If you’re interested in studying the Bachelor of Nursing or the Bachelor of Nursing Fast-Track, you will need to meet the following requirements:

If you’ve just finished school
An ATAR score of 65 or higher for the 3 year program; or an ATAR score of 75 or higher for the 2 year fast-track program.
There are no pre-requisite subjects that you need to study, but we recommend you have foundation knowledge of

− English Studies, Health Studies and Biology

If you're a mature age student
You will need to meet the following

− University general entry requirements

This course is a quota course meaning, limited places are available. If you are not accepted into the course in your first attempt, you can try to gain entry through study of an alternative pathway. We recommend the Bachelor of Health as your second preference if you wish to pursue an alternate pathway. Other pathways exist through Enrolled Nursing and General Studies degrees. For more information on alternative pathways visit www.utas.edu.au/health/study

Other information
After starting the course, you’ll need to meet Faculty of Health Safety in Practice requirements in order to undertake practice placements. For more information on this, visit www.utas.edu.au/health/professional-experience-placement

How to apply
It’s easy. Just head to www.utas.edu.au/apply

I’ve got some questions
Good. We’re always encouraging our students to ask them. So if you need more information, contact the Uni Info Centre or visit www.utas.edu.au/courses/study-areas/nursing-and-midwifery

The people behind the progress
About the Faculty of Health
Made up of two schools – Medicine and Health Science – and offering courses in everything from midwifery to medical research, the University of Tasmania’s Faculty of Health is as diverse as it is driven.

But for all these fields of study – and for all the research and innovation taking place in each of them – we’re all guided by the same common goal. To transform healthcare as we know it. And to improve the health of Tasmanians, Australians – and the world.

With staff of the highest quality, research partnerships all around the world, and an unwavering commitment to outstanding health education, we’re in a fantastic position to make progress on both a local, and a global scale.

For more information on the Faculty, our courses and our research head to www.utas.edu.au/health
