

# Exploring advanced resource tools in MyLO

An online module for staff

This module is for those wishing to fully exploit the learning management system's capabilities in presenting content. It explores the range of resource and media tools available to the builder/designer.

The module will help you to:

- Incorporate content from a variety of sources external to your course (such as CD-ROM)
- Establish and manage a database of text, images, audio and video using the Media Library tool, and integrate that database with content files and learning modules
- Explain the issues surrounding the incorporation of media-rich files into your course and the way those issues can be addressed/ameliorated.

## Structure and format

The module is available online. After you register you will have ongoing access to the module and a sample course. You can access these resources at any time and undertake learning at your own pace.

On successful completion you can assess your own learning using a checklist, which can be used for teaching portfolios etc.

## How long does it take?

The module takes approximately 120 minutes to complete.

## Learning requirements

### Prerequisites

You will need to have basic competence in using a computer and a web-browser. You will also find it useful to have worked through the modules: [Introduction to Preparing & Presenting Content](#) and [Exploring the build view in MyLO](#).

### Participant requirements

A computer with network/Internet access. You must be a current UTAS staff member to be able to access the learning management system.

### Who is the module suitable for?

This module is designed for builders/designers who wish to further develop their options for content presentation and media-enrich their online units.

## How to register

Access the registration webpage at [Teaching & Learning Online](#) and register in the module titled [Exploring advanced resource tools in MyLO](#).
