The project aims to develop a Mobile Web Application for Search Associates, Melbourne Job Fair. It will provide recruiters and candidates with efficient tools for communication. Search Associate admins are also able to update news and schedules through a web interface and publish them in real time.

Calendars
The application hosts calendar features such as the Public Timetable and candidate's personal schedule. Candidates are able to add public events to their schedule from the Public Timetable and also create their own personal events within their schedule. The recruiters are then able to view when each candidate may or may not be available for an interview during the fair.

Activities & itinerary
The application allows candidates to maintain preferred levels of privacy settings with other candidates at the fair while recruiters have full access to required information of each individual candidate. The app also hosts other features such as list of Schools, Candidates, Positions Vacant, Recruiter Information, RSVP and much more.

Meet Team T&T

Charlie Fraser
Lead Programmer

Binh Vu Thai
Report Coordinator, Programmer

Aaron Nash
Project Manager, Programmer

Usayed Mahmood
Lead Designer, Client Liaison

Rugian Lyu
Testing Manager, Programmer

Jingwei Li
Assistant Designer, Programmer
