

Personal Hotspots: iPhone4 setup & iPad WiFi Connectivity

On the iPhone 4, go to the settings icon select **“Personal Hotspot”**

This may also be found under: **“Settings → General → Network → Personal Hotspot”**

OR

Turn on the setting for **“Personal Hotspot”**. If you wish you can change the password.

On the iPad, go to the Settings icon, and then WiFi on the left hand side (ensuring that it is on). The iPad will search for WiFi networks and should find your iPhone4's WiFi hotspot.

Select that entry and enter the password from your iPhone4

If all successful, your iPhone will display a blue bar indicating that 1 device is connected and the iPad should show the WiFi connected icon at the top.

WiFi internet connectivity is now available on the iPad.
