

# EndNote and Ingenta

Importing records from Ingenta can be done directly without the need for an EndNote filter.

- Perform a search in Ingenta
- From the results list click on the title of the citations you wish to export (only one at a time)
- From the full record screen click **Mark item**. Repeat this for each additional citation
- Click the **Marked List** link on the right hand pane
- Under **Tools**, click on the **Export Options** link on the right hand side of the screen
- Click on the **EndNote** link. EndNote will engage.

**Marked List**

3 items in marked list.  
If you wish to keep your list for future reference, you must sign-in as a registered user first.

In EndNote...

- Your database record should now be loaded into the EndNote library you have open. If you don't have an EndNote library open, the record will be loaded into the library you last had open.

NOTE: The abstract is not imported with the citation. The abstract needs to be copied and pasted into your EndNote record.

Always check imported citations as editing may be required.
