

Building the Culture of Evidence-based Practice in Teacher Preparation for Mathematics Teaching CEMENT Conference

Participate in discussions and working groups about
what is important in your field of teaching.

7th and 8th of June, 2012

Sir Raymond Ferrall Centre
University of Tasmania, Newnham Campus

This is an interactive conference relevant to *all* educators:
Early Childhood, Primary and Secondary School Educators, University teaching staff,
as well as those interested in learning processes and implementation.

Key note speaker: Professor Marnie-Hughes Warrington

- The education scene in Australia and internationally
- Transferable skill sets (e.g. problem solving and clinical acumen)

Student Panel: The past, present and future of education

This conference will include a dissemination of the outcomes of a project conducted by a consortium of seven Universities across Australia as part of the Australian Learning and Teaching Council (ALTC) grant.

The project focussed on identifying and collecting data about the teaching of mathematics. Key competencies have been identified for mathematics education, along with ways of measuring these to provide data for course and teacher improvement. The processes used have application beyond mathematics education, and we hope to share these with you through your attendance. A communiqué addressing ways in which necessary skills can be acquired will be developed from discussions and feedback during this conference.

Your participation will contribute to:

A commitment to action for education methods

Attendance is FREE – Please share this invite amongst your colleagues and networks
