

## Tasmanian Marine Science Fellowships

*Overseas study grants for early career scientists*

The Tasmanian Government, the University of Tasmania and the Embassy of France in Australia have jointly created an Award in the field of Marine and Antarctic Sciences. This program enables early career researchers to travel to France to undertake study missions to:

- acquire a specific training or qualification
- strengthen cooperation and expand international networks; and
- gain recognition for their work.

Applications are open to Tasmanian postgraduate students, young researchers and scientists working in marine science. The total amount available for 2009 is \$ AUS15,000. This will support between one and three fellowships for a stay (return ticket and living allowances) in France from one to three months.

Applicants are requested to submit a project in conjunction with their Australian institution and their current or potential French collaborators/partners.

Applications for a 2009 Tasmanian Marine Science Fellowship are open from 1 May 2009 and **close on 1 July 2009**
