

## BCMS last upgraded in 2005

## Benefits of upgrade

- Look and feel very similar to the current version so no detailed training required
- User functionality is improved through the use of drop down lists for natural accounts eliminating extra key strokes.
- The FBT Wizard audit screen turned off eliminating confusion

## Benefits continued

- Documents/Links/Comments can be attached in BCMS at the claim level – no need to send paper work
- Users able to Re-set their own passwords (bit like web kiosk)
- Budget Centre details can be displayed on the coding screen

## Wish List

- If you have anything you would like to see changed/improved please email [Sarah.White@utas.edu.au](mailto:Sarah.White@utas.edu.au)
- No promises but will try to accommodate if we can

## Time Frames

- Waiting to hear back from ICMS as to when they can commence
- Hopefully live by June 2011
