

Schedule 2 – Software Configurations

Note: Due to the variety and nature of the work performed across the institution, it is neither desirable nor practicable to prescribe exact software configurations for all areas. IT Resources will therefore list recommended configurations, to be followed where feasible on new hardware purchased from this date henceforth. The purpose of this recommended software list is to provide a basis for standardisation where desired, and a Standard Operating Environment (SOE) platform upon which IT Resources will test and certify new and upgraded products, databases and training courses.

As of August 2005 the recommended standard software installation for new equipment (Windows PC or Mac OS) is:

Standard		Optional	
Windows	MacOS	Windows	MacOS
MS Windows XP	MacOSX (10.4)	Oracle Jinitiator (FMIS)	Adobe Creative Suite
MS Office 2003 Professional	MS Office 2004	Oracle Discoverer	Firefox Browser
Eudora 6.0.3	Eudora	HRMS	Macromedia MX 2004
Netscape 6.2.3	Netscape 4.77	Archibus	Indesign Illustrator
Internet Explorer 6.0 SP1	Nifty Telnet	Pinnacle	Photoshop
NAI McAfee Anti-Virus 8.0	Internet Explorer 5.5	Quicktime Player 6.0	Filemaker
ZIPCentral	NAI Virex 7.6	TRIM Captura	EndNote
Acrobat Reader 7.0x	Aladdin Stuffit	Lotus Notes 6.5	Lotus Notes 6.0
Sun JRE 1.4.2.08	Acrobat Reader 5.01	InfoSafe	Retrospect Remote
	Safari 2.0	Retrospect Remote	
	Quicktime Player 7.01	EndNote	

Other software purchases outside the above parameters should be undertaken in accordance with Standard 2 – Software Provision (Purchasing & Leasing)

Updated information will be maintained at <http://www.utas.edu.au/itr/standards/>
