

EndNote and BiblioLine

Importing records from BiblioLine databases can be done directly without the need for an EndNote filter.

In a BiblioLine database ...

- Perform a search.
- Mark the citations you want to save by clicking the checkbox against the desired citations
- From the *Select Output Format* dropdown menu at the top of the screen, select **output: Marked Full Records**
- Click on the button **Export**. A *Record Export Instructions* screen appears.

- Click on the link **EndNote**. A *File Download* dialogue window appears.
- Click on the **Open** button. EndNote will engage.

In EndNote ...

- A **Select a Reference Library** dialogue window appears.
- Select the library you would like the citations put in and click **Open** (you must do this even when your library is already open).

Your database records should now be loaded into your EndNote library. Check the imported references as they may need some editing.
