

EndNote and CrossSearch

Importing records from CrossSearch can be done directly without the need for an EndNote filter.

From CrossSearch...

- Perform a search.
- Mark the citations you want to save by checking the box to the left of the citation.
- Click on **Export/Save** at the top of the results.
- From the **Export Selected Records** screen (shown below) select **In a format compatible with EndNote, ProCite, etc.**
- Click **Export**

The screenshot shows the CrossSearch interface. At the top, there is a search bar with the text "Put quotation marks around your words to search for a phrase". Below the search bar, there are tabs for "Refine Search" and "New Search", and a "Help" link. The main area displays search results for the query "keyword contains poultry". The results are sorted by "Date" and show "Results 1-25 of 179 returned for 'keyword contains poultry'". A navigation bar shows page numbers 1-2-3-4-5-6-7-8. Below the results, there is a checkbox labeled "Select all records :: 4 selected records: Email or Export/Save". The "Export Selected Records" dialog box is open, showing options: "Directly to RefWorks", "In a format compatible with EndNote, ProCite, etc." (selected), "As HTML", and "As Plain Text". A "Cancel" and "Export" button are at the bottom right of the dialog. The first result is checked and shows the title "1. The animal-human interface and infectious disease in industrial food animal production: Rethinking biosecurity and biocontainment" by Graham, JP, from PUBLIC HEALTH REPORTS, MAY-JUN 2008, Vol. 123, Iss. 3, p.282-299, Source: Web of Science.

- On the **Exported Records** screen click **Save records**
- A file download box appears click **Open**.

In EndNote ...

- A **Select a Reference Library** dialogue window appears.
- Select the library you would like the citations put in and click **Open** (you must do this even when your library is already open).

Your database records should now be loaded into your EndNote library.

Note:

All records are loaded as generic records into EndNote. Extensive editing is required.
