

EndNote and Engineering Village

Importing records from Engineering Village databases can be done directly without the need for an EndNote filter.

In an Engineering Village database ...

- Perform a search
- From the list of articles retrieved, mark the desired records by clicking on the checkbox against the record.
- Click the **Detailed record** button at the top or bottom of the list of citations.
- Click on the **Download** button at the top or bottom of the list of citations.
- You are presented a *Download Selected Records* screen.

- Click on the *RIS, EndNote, ProCite, Reference Manager* button
- Click the **Download** button
- A *File Download* window will appear. Click the **Open** button.

In Endnote ...

- EndNote will engage presenting a dialogue box *Select a Reference Library*.
- Select your library and click *Open* (you must do this even when your library is already open).

Your records should now be loaded into your Endnote library.
