

EndNote and Informit databases

Importing records from *Informit* databases can be done directly without the need for an EndNote filter. Although some *Informit* databases have fulltext articles, only brief citations will be loaded into your EndNote library.

From the *Informit* database...

- Perform a search.
- Mark the citations you want to save by clicking the checkbox against each desired citation
- When finished marking citations, click on the **Save** link at the top of the screen

On the *Save Records* screen

- From the *Fields to Save* dropdown menu, select Complete Record
- From the *Label Format* dropdown menu, select Short Field Labels
- From the *Output Format* dropdown menu, select EndNote Direct
- Uncheck the box for *Search History*
- Click on *Save Records* button

EndNote will be activated.

Query	Recs
#2 rabbits	72
#1 (rabbits and fleas)	0

In EndNote ...

- A **Select a Reference Library** dialogue window appears.
- Select the library you would like the citations put in and click **Open** (you must do this even when your library is already open).

Your database records should now be loaded into your EndNote library.

Notes:

Always check and correct the imported citations as not all databases import data correctly.
