SCOPE OF PRACTICE

All students and preceptors should be aware of the Scope of Practice Decision Making Framework as well as the ANMC code of professional conduct for nurses in Australia, 2008. Students should never undertake care which is outside of their scope of practice; this includes care which has not been covered in the unit which you are enrolled. Students who act outside of their scope of practice are breaching these standards. The School of Nursing and Midwifery take these breaches seriously and act accordingly. Unsafe practise may result in a student being withdrawn from PEP. For further information refer to ‘Withdrawal from Professional Experience Placement’ in the BACHELOR OF NURSING PROFESSIONAL EXPERIENCE PLACEMENT INFORMATION BOOKLET.
