Practice tasks 4

1. If the time is 6.15am in Launceston, what is the time in Perth? (non daylight saving time)

   The time difference between Launceston and Perth is 2 hours, therefore it would be 4.15 AM in Perth.

2. If the time is 7.30am in Sydney, estimate what the time might be in New Zealand. Would it be a reasonable time to phone someone in New Zealand? (non daylight savings time)

   New Zealand is ahead of Sydney by 2 hours so at 7.30AM Sydney time it would be 9.30AM in New Zealand and it would be reasonable to phone someone.

3. If the time is midday in Perth, what would the time be in Alice Springs? (remember, 0.5 refers to ½ an hour – see P.V. module 1)

   If it is noon in Perth, the time in Alice Springs would be 1.30 PM

4. You are flying to Perth in the summer during daylight savings time. Your flight with duration of 4 hours 35 minutes leaves Sydney at 4.10pm. What time will it be when you arrive in Perth?

   If it is 4.10 when your flight leaves in Sydney and you fly for 4 hours and 35 minutes the time in Sydney would be 8.45PM. With the 3 hour difference during daylight saving, you would arrive in Perth at 5.45PM
