

## ANIMAL HEALTH WORKSHOP

# WHAT IS YOUR DISEASE RISK RATING?

Is your farm at risk? Learn how to stop diseases from entering or spreading on your farm, particularly in your calf shed.

Hear from Colleen Stewart (Scottsdale Veterinary Service) or Craig Dwyer (Smithton Veterinary Service) about common dairy cattle diseases, how they spread and how they can be controlled.

Join in the discussion with local dairy farmers about how they minimise disease risk on their farm and manage disease in their calf sheds.
