Discover skills for the future and make a difference in your career.

Through economics, you can follow your passion and shape the world. Get the knowledge and skills to create an exciting career. Our Bachelor of Economics offers you a pathway to specialise in either Industry, Policy and Business Strategy or Society and Environment, both teaching you how to understand the world around you, while supporting industry and government through policy and practice. You’ll also be able to cross-skill by studying a range of electives from other areas of the University.

WHY STUDY ECONOMICS WITH US?

- Make a difference with your career.
- Help solve the economic and financial challenges of the future.
- Learn from leading experts whose links with industry ensure that their teaching remains contemporary and relevant.
- Hands-on learning experiences: corporate internships, report writing, multidisciplinary teamwork, and industry case studies.

"I figured that if there were prominent alumni, such as economist Saul Eslake, who were well regarded then there was probably nothing stopping me from achieving my career aspirations."

– PETER LEGG BACHELOR OF ECONOMICS WITH HONOURS

WHAT WILL I STUDY?

Industry, Policy and Business Strategy
Understand contemporary economics and develop the analytical and problem-solving skills required to be a successful professional. Students are prepared for success in business and industry including key growth industries in Tasmania and beyond: energy, agriculture, and business strategy. You’ll be equipped with in-demand skills from businesses, Local, State, and Commonwealth government agencies as well as a range of consulting firms and non-government industry organisations.

Society and Environment
Are you interested in finding economic solutions to make a positive impact on society and the environment? This major teaches you about contemporary economics with an applied focus on social and public policy. You’ll learn about issues facing the world today, including environmental management and resource economics, the economics of social issues including crime and education, regional development, and other issues in public policy. Graduates gain a set of skills and experiences valued by businesses, consulting firms, government, and non-government agencies.
