

## Graduate Certificate in Economic Geology

**A new option is now available at CODES for industry geologists seeking to enhance their skills either for professional development or as a foundation for pursuing postgraduate training.**

The Graduate Certificate in Economic Geology is a two coursework unit option designed for professional geoscientists keen to gain a stronger understanding of ore deposits. Students enrolling in the Graduate Certificate will complete one foundation unit – Fundamentals of Economic Geology (online delivery mode). They will then choose one optional unit, with the following options for 2021:

- Ores in Magmatic Arcs (in person, field-based course<sup>^</sup>)
- Geometallurgy (in person, with a field excursion<sup>\*</sup>)
- Ore Deposit Geochemistry, Geochronology and Hydrology (online)
- Geodata Analytics (online)

The Graduate Certificate in Economic Geology will introduce you to the theory, acquisition, analysis, and interpretation of a wide range of geological data sets that impact the mining value chain. It is taught by a team of highly qualified national and international experts from industry, academia, and government.

The Graduate Certificate in Economic Geology is a great way to upskill in your current career as a geoscientist, and can be counted as credit towards CODES' Master of Economic Geology program, if you subsequently choose to pursue postgraduate study. You will gain skills directly relevant to mineral exploration and mining, government surveys and academic research.

**Structure:** 2 units (total 50 credit points)

**Timeframe:** 1 year

**Delivery:** Intensive (generally 2 weeks per unit) online +/- face-to-face (depending on unit choice)

**Cost:** Tuition fees (2021 rate) of \$1,987 per unit for domestic students with Commonwealth supported places, and \$4,708 per unit for full-fee paying domestic students. International student tuition fees are approximately \$8,488 per unit.

**Applications:** <https://bit.ly/3x9xVen>

<sup>\*</sup> Additional costs apply for units with a fieldtrip component to cover ground transport and accommodation (travel to and from the field location &/or Hobart is the responsibility of the student)

<sup>^</sup> COVID-19 travel restrictions may impact the running of this unit
