The Graduate Outcomes Survey (GOSS) is a national survey of Australian higher education graduates and is run on behalf of the Australian Government Department of Education and Training. The GOSS collects information about the labour market outcomes and further study activities of graduates 4-6 months after the completion of their course. The results of the research are used to help higher education providers and the government gain insight into graduate destinations. The 2017 GOSS was administered to all 2016 graduates.

**Graduate Employment Outcomes**
