Master of Clinical Nursing H7F

If you are passionate about nursing and would like to develop your skills and advance your career options, our Masters degree is for you.

Career outcomes
The Master of Clinical Nursing course is designed for those who are already working in the field of nursing. Upon graduating, you will have a deeper understanding of the practice and how to overcome key issues and adapt to ongoing changes, making you an ideal candidate for leadership positions and career advancement.

What you'll study
The Master of Clinical Nursing course comprises of two units, one of which is an elective:

Core unit
• CNA803 Advanced Clinical Nursing Practice

Elective units (select one)
• CNA802 Advanced Professional Nursing Practice
• CXA703 Guided Research C

Note: Entry into the master’s program requires initial completion of the Graduate Diploma (H6F) or the Professional Honours (H4F).

Entry requirements
Applicants for the Master of Clinical Nursing will need to hold current registration as a nurse with APHRA.

For direct entry into the master’s program, you will need to hold a graduate diploma (or equivalent) in nursing, with a credit grade average.

In some cases, students with other qualifications or experience will also be considered.
