

MASTER OF ECONOMIC GEOLOGY SHORT COURSE

Geodata Analytics

5 October—18 December 2020

Delivery will be in English, and interactive sessions will occur between 9AM - 5PM AEDT (+11UTC)

CODES, Centre for Ore Deposit and Earth Sciences, University of Tasmania

CRICOS Provider Code 00586B

UNIVERSITY of
TASMANIA

AUSTRALIA

PRELIMINARY PROGRAM

MODULE 1 - FUNDAMENTALS

Online self-directed learning
5 October—13 November 2020

Basic statistics, databases and exploratory data analysis, data formats and data preparation such as filtering and transformation, classification and querying of database queries, image analysis and segmentation. Peer-review of literature and a case study involving data analytics.

MODULE 2 - METHODS AND TOOLS

Online lectures and practicals
16—20 November 2020

Identify, integrate and process relevant data to produce models, carry out analysis and visualization with an emphasis on reproducibility and reporting outcomes. Datasets will focus on mineral exploration or mining-related problems.

MODULE 3 - COLLABORATION, INTERPRETATION AND COMMUNICATION

Online self-directed & collaborative learning
23 November—18 December 2020

Using a variety of geoscience datasets and working both individually and in groups, students will carry out a series of data analyses to, for example, identify prospective areas in mineral exploration environment, or predict rock properties around a mine. Students will be required to integrate their analyses and findings in small groups and contribute to an online seminar.

In the geosciences, as in all areas of human endeavour, the amount and availability of digital data is increasing exponentially. Increasingly, industry-based geoscientists will be expected to use sophisticated, cost-effective and innovative methods to process and interpret large amounts of multivariate digital data to enhance insight, decision making, and process automation. This rapid and ongoing shift from manual to automated methods for modelling complex geological phenomena has resulted in a knowledge gap. This limits the possible degree of understanding and knowledge to be gained from data or in the worst case, poor choices for analyses may lead to erroneous interpretations.

The Geodata Analytics course is a timely addition to the CODES Master of Economic Geology degree and will focus on rigorous and reproducible methods for extracting and visualising meaningful information from geological data. Participants will learn data science fundamentals, how to design and construct automated workflows and communicate resultant models to aid collaborative interpretation and facilitate decision making.

This course is divided into three modules delivered online and in succession.

COURSE PRESENTERS

Matthew Cracknell is a Research Fellow at CODES. He is an expert in geoscience data analysis, modelling and visualisation.

Shaun Barker is Associate Professor in Economic Geology. He is an expert on the application of stable isotopes, lithogeochemistry and mineral chemistry to mineral exploration.

Guest presenters for the course include **Rocky Barker** (Waikato University), **Natalie Caciagli Warman** (Barrick), **Michael Gazley** (RSC Mining and Mineral Exploration), **June Hill** (CSIRO), **Shawn Hood** (Goldspot Discoveries), **Kyen Knight** (Mineral Resources Tasmania), **Javier Merrill** (TMVC/CODES) and **Angela Rodrigues** (Monash University).

Geodata Analytics

is offered as a unit in the national Minerals Geoscience Masters program.

MASTER OF ECONOMIC GEOLOGY

THE MOST COMPREHENSIVE MASTER DEGREE IN MINERAL EXPLORATION AND MINING GEOLOGY ANYWHERE IN THE WORLD

This course work-based Masters program is aimed at geoscientists who want to gain a thorough up-date on advances across the spectrum of economic geology applied to mineral exploration. The Master of Economic Geology at UTAS is part of the national Minerals Geoscience Masters program, jointly offered by the University of Tasmania and the University of Western Australia, in conjunction with Curtin Business School at Curtin University.

Course structure

The Masters course can be completed in either of two ways:

Option 1: requires the completion of six coursework units and a minor research thesis. Four of the units must be completed at CODES, while the remainder may be completed at other participating universities. Duration: 18–24 months full-time; up to 30 months part-time (flexible in recognition of industry participants).

Option 2: requires the completion of eight units of coursework, at least four of which must be undertaken at CODES. Duration: up to 30 months part-time (flexible in recognition of industry participants).

Participating universities offer up to seven units annually or in rotation over a two-year period. Most units are of two weeks duration.

Courses offered by CODES

- KEA707 Ores in Magmatic Arcs: next offered 2021 *
- KEA708 Volcanology and Mineralisation in Volcanic Terrains (New Zealand, western Tasmania): next offered March 2022

- KEA709 Ore Deposit Geochemistry, Hydrology and Geochronology: next offered 2021 *
- KEA710 Exploration in Brownfield Terrains: next offered 19–30 October 2020
- KEA711 Geometallurgy: next offered 2021 *
- KEA712 Ore Deposit Models and Exploration Strategies: next offered October 2022
- KEA713 Geodata Analytics: next offered October–December 2020
- KEA718 Advanced Field Skills in Economic Geology: next offered 2021 *

* 2021 course schedule yet to be finalised due to uncertainty of COVID19 related border restrictions

Fees

UTAS tuition fees for 2020 are \$2,381 per unit (8 in total) for domestic students and \$8,488 (AUD) per unit for full-fee paying overseas students (FFPOS). Field-based courses have additional costs. Costs will vary for units taught by other MGM partner institutions.

Entry Requirements

A BSc (Hons), or a BSc (majoring in geoscience) with at least two years industry experience. International students should also refer to <http://www.international.utas.edu.au>. English language proficiency requirements also apply.

REGISTRATION FORM

Geodata Analytics

5 October—18 December 2020

PERSONAL DETAILS

Title—Please highlight (Prof / Dr / Mr / Mrs / Ms / Miss)

First Name: Last Name: (surname / family name):

Preferred Name:

Position:

Company / University:

Address:

City: State: Postcode: Country:

Email: Phone (mobile / cell):

Dial-in Location (ie City): Dial-in Timezone (e.g. UTC+10):

REGISTRATION FEES

All fees are in Australian dollars (AUD) and include GST.

Please indicate ☒

Minerals Geoscience Masters Program (MGM) Students:

(Excludes UTAS tuition fee)

- ☐ Full course (free)- University of Tasmania enrolled
☐ Full course (free)- University of Western Australia enrolled

Industry Participants:

- ☐ Full course (\$3,300)*
☐ Module one (\$990)
☐ Module two (requires completion of Module one) (\$1,650)*
☐ Module three (requires completion of Module two) (\$1,650)*

Other Students:

- ☐ Full course (\$550)*
☐ Module one (\$165)
☐ Module two (requires completion of Module one) (\$275)*
☐ Module three (requires completion of Module two) (\$275)*

* Participant numbers for Modules two and three are capped, with preference to enrolled MGM students. Other interested parties will be advised whether their preferred participation option is available by September 24th.

PAYMENT

Registrations are due by the 22nd of September, 2020. Full payments are due by the 1st of October, 2020.

Preferred payment method. Please indicate ☒

☐ Credit Card

Upon receipt of your registration form and confirmation of your place, you will be provided with a payment reference number and web address for online payments. Please note: Credit card details cannot be accepted by email.

☐ Cheque or Bank Draft

Please make cheques and bank drafts payable to "The University of Tasmania". Bank drafts must be made out in Australian currency (AUD).

☐ Invoice

Name, address and email address for person responsible for payment of invoice:
