Duration Min. 1 year, max. 3 years

Location Launceston and Hobart

Pharmacy is considered to be one of Australia's most trusted professions.

The pharmacy degree at the University of Tasmania is a professionally accredited program, providing you with specialist skills and expertise in the basic and clinical pharmaceutical sciences. This is complemented by hands-on experience through professional experience placements, which help you gain the skills required to become a registered pharmacist in Australia.

Pharmacy graduate Adrian Hodge talks about the experience of working in Dodges Ferry, Tasmania, and becoming part of the community.

CAREER OUTLOOK

The healthcare industry is expected to grow by over 15 percent over the next five years, making pharmacy an exciting choice for any students who like science and interacting with people.

100% of Bachelor of Pharmacy students from the University of Tasmania gained full-time employment within four months of graduating.

A degree in Pharmacy will open up a range of career opportunities. These include employment in communities, hospitals, consulting, and reviewing patients' medication at home. You could also work in the pharmaceutical industry, in design, manufacturing, and quality control. There are also roles in research academia, in other biomedical sciences, and in the armed forces.

Department of Employment, Skills, Small and Family Business
five year projections from May 2019 to May 2024.

WHAT CAN I STUDY?

Medication Safety

Pharmacists are medication experts. When you study pharmacy, you'll learn about the role of a pharmacist, how medications and dosages are created, and how medications work in the human body.

Practice-Based Training

Learning in the community, hospital and other pharmacy practice sites throughout Tasmania and possibly interstate and overseas.

Evidence-based Practice

Learn contemporary evidence-based practice that is applied to both hospital and community pharmacy settings.

Learn more about studying Pharmacy here.

"If I had to pick a highlight of my career so far, it would be implementing governmental state-wide policies within the Health Department."

– AMBER ROBERTS,
BACHELOR OF PHARMACY ALUMNI
