Advanced Pasture Management Workshop

Learn about managing and using pasture measurement and feed quality data; pasture mixes to maximise milk production; managing pasture quality; increasing clover content; irrigation management; and sustainable grazing practices.

JUNE 9 & 16, 2021 | 11AM TO 2PM
DAIRY PLAINS HALL
**COVID-19 & TIA DAIRY EXTENSION EVENTS**

Based on Tasmanian Government requirements and to keep people safe at dairy extension events, the TIA dairy extension team would like people to be aware of the following procedures when attending a discussion group, field day or workshop.

**Should you attend?**

**Do NOT attend if you:**
- Have Covid-19.
- Have been instructed to quarantine and your 14 days are not yet finished.
- Are unwell, including with fever or respiratory symptoms, e.g. shortness of breath, cough, sore throat.
- Have been tested for Covid-19 and are waiting for results.

**Some people are particularly vulnerable to the effects of Covid-19, these include:**
- People 70 years of age and older.
- People 65 years of age and older with chronic health conditions.
- Indigenous Australians 50 years of age and older with chronic health conditions.
- People with compromised (weakened) immune systems.

If you are in one (or more) of these categories, carefully consider whether you should attend group extension events.

**If you are unable to attend an event in person, the TIA dairy extension team will do our best to ensure you have access to a livestream or recording of the event or written information relating to the discussion points. If you would like to know more about these options, please contact a TIA dairy extension officer (contact details below).**

**Attending a TIA dairy extension event**

- Please use the hand sanitiser to sanitise your hands when you arrive.
- All your field day/discussion group supplies will be given to you in a bag.
- Fill-in a 'health declaration' form (provided in your bag). This will simply ask you to confirm you are not unwell and are not required to be in quarantine. This form will ask for your name and phone number to allow for contact tracing if that is required. This will be an individual form to reduce the sharing of pens/clipboards and will take the place of the usual sign-in sheet.
- Keep 1.5 metres from people not in your household.
- Cover your cough and sneeze with your elbow or a tissue, then dispose of the tissue in a rubbish bin.
