

Language entry requirement and course progression

You can work out below how long you may need to study, to successfully complete the Direct Entry course and enter your University of Tasmania degree.

While many students progress steadily through their course, some students may need to spend additional time building their skills and confidence. It is important to note that you may need to repeat one or more levels if you're not making satisfactory progress. When thinking about your study plans, you may need to allow time for additional study before commencement of your intended degree.
