At the Pharmacy Taster Day you will learn about pharmacy as a unique career opportunity that integrates multiple fields of study including science, medicine, business and patient care.

In this workshop, you will learn the importance of early health detection and conduct your own 20 minute health-check. You will have a chance to test your own blood pressure, blood glucose level, and physical health and find out what practical advice pharmacists can offer on how to improve general health and wellbeing.

2. Fancy pharmaceuticals
Of the many different aspects of modern pharmacy practice, one of the most interesting and enjoyable remains the traditional practice of ‘compounding’ or making medicines. In this workshop you will learn about the importance of pharmaceutical science and carry out some practical work in the laboratory. You will make a simple moisturising cream and take home your own sample. ‘Fancy pharmaceuticals’ will shed light on drug formulation and compounding techniques as well as the legal requirements of dispensing a product, including packaging, labelling, expiry dates, record keeping and how not to make mistakes!

3. Community pharmacy simulation workshop
Be a pharmacist. Play through patient scenarios in a simulated community pharmacy game. Learn the role and responsibilities of a community pharmacist by helping virtual patients address their health concerns.

Registration details
Registration is open to all year 9,10,11 & 12 students. Places are limited so get in quick and register at:
www.utas.edu.au/health/study/taster-days
Registration closes Monday, 20th August 2018
