Medical help near me

If you are new to the area it can be hard to find information on where to get help. This information sheet lists some of the hospitals and clinics close to campus.

I am feeling sick. What do I do?
If you are feeling unwell it is important to see a doctor. In medical emergencies call ‘000’ for an ambulance. When you are very unwell, are experiencing difficulty breathing, or experiencing flu like symptoms, go to the hospital. Flu like symptoms include fever, sweats, chills, muscle and body aches, headaches, coughing, sore throat, runny or stuffy nose, fatigue (tiredness) and nausea or vomiting.

If you are going to a doctor or the hospital with flu symptoms please call ahead and let them know your symptoms as well as any travel or interaction with those who have been travelling. This will help them prepare for your visit and minimise the risk of any infection spreading.

What can I do to prevent spreading illness to others?
If you have symptoms of cold or flu you should wash your hands frequently. It is also important to use good cough etiquette, which means coughing into your elbow or using a tissue and disposing it thoughtfully, washing hands afterwards. Remember that cold and flu medication might help you to feel better but it doesn’t stop the spread of infection.

Where can I get medical treatment near me?
If you have a local doctor you have seen before, you can contact them and seek an emergency appointment, letting them know your reason for calling. If you do not have a doctor locally we’ve pulled together a list of some of the hospitals and clinics around each of our campuses below.

International students please note that hospital visits for non-emergency matters can incur an out of pocket fee of up to $500. It is advisable to visit a Medical Clinic for non-emergency appointments.

Arrangements with Overseas Health Cover providers are noted, otherwise costs for appointments are paid at the time of appointment and international students can claim expenses back through Overseas Student Health Cover provider.
