It is not to my liking that parental rights will be affected so they may even be criminals and go to jail for domestic violence. These children are not old enough to make such decision that are irreversible. More attention needs to be given to medical and scientific and religious briefs and opinions.

I have strong faith and try to abide by God's laws and gender is important. It is also important to treat all with respect and be kind to everyone.

I hope these laws do not come in.
