- University College, Short Courses and Pathways

ROOM 165

Your Cradle Coast Campus

Chat with our friendly team and learn all about what our new campus has to offer.

ArchiTours

Take a guided tour of our new campus. You'll learn about the architectural ideas and innovation behind West Park.

LIBRARY

Drop by and check out our new library. We're always open to the community.

ROOM 118

What does Education Mean to You?

Experience our learning technology and submit an entry telling us why education is important to you. You could win a \$25 voucher at the Cabin Coffee Cafe.

ROOM 123

Leadership Matters

What is a leader? What makes them special? Identify the type of leader you value, and how you can make small choices to shape the leaders around you.

Free Tax Clinic

Our Tax Clinic provides free advice and support for unrepresented, lower income or vulnerable taxpayers and small businesses. Discuss superannuation, retirement, Centrelink assistance/payments, tax returns, pensions and more.

ROOM 124

Demystify Financial Statements

In this hands-on game, you'll look at the financial statements of a not-for-profit organisation, how they're built, and how to interpret them to make good business decisions. **10.20am – 11.20am**

Becoming a Teacher Q&A

Considering a career in Education? Join us in conversation with current students in different phases of study. Hear their personal stories and experiences. **11.35am – 12.05pm**

Afghanistan in Focus

Join our panel of multidisciplinary experts for a conversation about the evolving situation in Afghanistan. Topics covered include the withdrawal of troops and what the future may look like. **12.20pm – 1.05pm**

ROOM 126

Explore Our Underwater Vehicles

Learn about the latest technology and engineering in the maritime industry. Check out a range of underwater vehicles used for real-life testing in the maritime industry and research.

Defusing Bombs in Virtual Reality

Use our VR headsets to diffuse a simulated bomb with your family or team members.

Technologies to Achieve Your Future

From the food on our plates to satellites in space, our lives rely on computing technologies. Learn how Information and Communication Technology supports every industry around the world.

ROOM 137

Software Engineering Project Management

We all use software in our day-to-day lives, but few of us know how it's developed. Experience the excitement of a rapid development project and learn how software is made. **10.30am – 11.30am**

Intelligent Robots

Robots are becoming increasingly important in agriculture and manufacturing. But how do they work? Let's think like a robot and see if we can design our own personal helper in an hour. **11.45am – 12.45pm**

ROOM 142

Disease Detectors

Learn how we identify, trace, and prevent the spread of plant diseases. Microscopes will be set up so that you can try to identify different plant diseases.

ROOM 156

Drawing with Tony Flowers

Come and draw with design teacher and children's illustrator Tony Flowers. Collaborate with Tony as he creates an artwork inspired by your ideas to celebrate the Cradle Coast.

UPSTAIRS

SIMULATION 222

Nursing Simulations

Experience how health students learn to work in teams, dealing with everything from wound care to emergencies. Plus, explore the range of exciting technology that students engage with.

ROOM 235

Beyond First Impressions

Discover the person behind the photo. Join our experts and take a deep-dive into how first impressions can impact the way we interact with and support others.

ROOM 241

Pharmacy: The Art of Compounding

Learn about the most accessible health profession and how you can become a pharmacist. Plus, play our online role-playing game and make your own hand cream.

Study Psychology on the Cradle Coast

Join our psych team for fun, hands-on activities. Learn about the principles of human behaviour and all the career possibilities that studying Psychology has to offer.

Ask Us: Health and Medicine

Talk to students about applications, courses and what it's like to study Nursing, Medicine and Pharmacy. You'll also learn about the exciting technology students engage with.

Better Health Through Nutrition and Exercise

Come and learn how our research is helping to support better health outcomes on the North West Coast.

ROOM 242

Tasting Plants and Smelling Soil

Unleash your inner-child and discover the world of soil and plants. Find out what you and animals have in common and why soil is so important for our future.

3D Geological Visualisations

Check out our range of interactive 3D visualisations. You can explore the Savage River mining operation, the geology of western Tasmania and the entire Australian continent.

OUTSIDE

The Dinosaur!

Come and meet a walking dinosaur, who will be mingling with visitors during the day.

Transforming the World of Food

Inside of the MILE Truck, we're bringing together technology and industry to solve real-world problems and create new opportunities. Discover how Industry 4.0 is changing the way we produce, prepare and consume food.

Children's University Tasmania

Ask Jesse and Vicki about all the Children's University learning experiences for kids happening at Open Day! Plus, see them to get a stamp in your passport.

Uni Life and Support

We offer plenty of programs to keep you healthy and well. We'll also work with you to develop your academic and employability skills and give you a range of experiences outside the classroom.

Riawunna Centre for Aboriginal Education

Riawunna provides a culturally welcoming space for Aboriginal and Torres Strait Islander students. This includes academic support, help with applications, computer labs, cultural experiences and more.

Sport, Fitness and Health

Whether you want to experience something new or pursue your sport at the highest level, we provide the first-class equipment and sporting facilities you need. Learn all about our gyms, clubs and more.

Get hands-on experience in the industries that are changing the world.
