## Bachelor of Medical Research

> [VIEW COURSE DETAILS](#)

**Duration** Min. 3 years, max. 7 years

**Location** Hobart

CRICOS: 055221K

Uncover the mysteries of human health and disease by studying a Bachelor of Medical Research.

This unique course is designed and taught by active medical researchers. It will give you a strong foundation in biomedical sciences, while equipping you with an understanding of the emerging technologies, strategies and tools used to address medical research problems.

As a graduate, you'll join a world-wide network of researchers advancing our understanding of health and disease, from right here in Tasmania.

“

“I was supported by an excellent group of researchers and academics at the University of Tasmania, who encouraged me to pursue my goals which led to a PhD in malaria at the University of Oxford.”

– RHEA LONGLEY, ALUMNI

## WHY STUDY MEDICAL RESEARCH WITH US?

Learn research methods, critical thinking and communication skills from world-leading medical research scientists.

Enjoy an immersive research experience and participate in project-based and hands-on research in a lab setting.

Acquire skills specific to medical research and experience a learning environment with a multidisciplinary and integrated focus.

Learn about the opportunities for your career once you graduate, and how medical science makes an impact on our global community.

## WHAT WILL I STUDY?

Over the three years of this degree you'll learn how to:

- Demonstrate knowledge in the fields of Medical Research and biomedicine. Specifically, in the context of understanding health and disease.
- Design and conduct experiments and interpret scientific data.
- Source, critically evaluate and analyse information relevant to medical research.
- Communicate scientific information to a variety of audiences.
- Describe the local and global importance and impact of medical research.
- Conduct work in a legally, ethically, socially and culturally responsible manner.

## CAREER OUTLOOK

Medical researchers apply their expert scientific skills and research findings to develop a better understanding of illnesses and other medical problems. They work towards practical solutions, developing new medicines, finessing existing drugs, testing new products and figuring out measures to prevent and combat diseases.

This course will give you the necessary skills to work in medical research across a range of sectors, including universities, hospitals, research institutes, biotechnology and biomedical industries, and government departments.

The healthcare industry is expected to grow by over 15 percent over the next five years.

Department of Employment, Skills, Small and Family Business  
five year projections from May 2019 to May 2024.
