If you’re keen to build your CU hours – check this out 😊

Earn up to 1-2 hours per challenge – time awarded is at discretion of School Coordinators

**What are you doing over the holiday break?**  [Up to 1 hour]

It’s getting warm now – did you know that on average, January is the hottest month in Tasmania? We hope you are well and keeping cool. Are you looking to add some CU hours over summer? On the back page there is a sample planner to help you get organised. Write down the activities you plan to do and draw a picture of you doing an activity. Show your picture to your School Coordinator.

**Your Week (or weekend)**  [Up to 1 hour]

Bring a camera and take photos of what you did on a week of your choice. Paste a couple of photos and a couple of sentences to show your School Coordinator about what you did and enjoyed during the week.
Children’s University Tasmania
Summer Activities 2020-2021

Your Public Learning Destination  [Up to 2 hours]
Imagine you have the opportunity to open your very own Public Learning Destination. We want to know what kind of place it would be. What name would you choose for it? What kinds of activities would you run? Where would it be located? Who would stamp CU passports? Draw a picture or build a miniature version of your Public Learning Destination, using easy to find materials. Show your School Coordinator.

Create your own Cartoon Character  [Up to 2 hours]
Do you have a favourite character from cartoons, comic books or movies? Your challenge is to create a new cartoon character for the world to meet. What will your character look like? We’d love to learn about your character’s story! Use your art and craft skills to create your character and show your School Coordinator.

Summer Activities 2020-2021

**Beating Around the Bush** [Up to 1 hour]

Have you ever heard people use sayings or idioms such as “beating around the bush”? There are heaps of popular local sayings. Your challenge is to find a saying – you might have to ask an adult for some examples to get you started. Once you have chosen a saying, draw a picture of it and show your School Coordinator.

**Your favourite hobby!** [Up to 1 hour]

It’s been a challenging year for some people to do their hobbies – lots of clubs became closed and events were postponed! Hobbies are good for our health. Tell us about your favourite hobby and add some photos or pictures – you can make it into a poster or other fun artwork. Show your School Coordinator.
News Update  [Up to 2 hours]

Imagine you’re the News Presenter on TV Media – the audience need a 1 minute update on a news story of your choice. To prepare, make some props such as a poster and jot a few notes if needed. Make a short video that covers your chosen news story. Show your video and props to your School Coordinator.

Backyard Chalk Murals  [Up to 2 hours]

Please make sure you have your parental or carer permission before doing this challenge. Chalk murals are a great art form, without leaving permanent marks. Think of a positive message to share with others. Find some chalk and a safe backyard space to make your mural. Show a photo to your School Coordinator.
Leaf Arts  [Up to 2 hours]

Did you know that a lot of amazing artworks can be created from leaves? Think about what you’d like to create and what your creation will look like – what size leaves and what colours will they need to be? Gather the fallen leaves you need and use a safe adhesive like craft clue to stick your leaves onto paper. You can do more than 1 artwork if you like. Show your leaf art or a photo to your School Coordinator.

What are you eating?  [Up to 1 hour]

Eating healthy food gives you energy to have fun! Record the foods you eat over 1-2 days and make a poster with a food pyramid, pie circle or other shape with food drawings. Name 1 healthy food and 1 less healthy food on your poster. What is your favourite food and why? Show your poster to your School Coordinator.

Summer Activities 2020-2021

**Daytime Moon**  [Up to 1 hour]

Have you ever looked up to the sky and seen an awesome daytime moon? On certain days, the moon (or part of the moon) may be seen quite clearly. The challenge is to find the right day – usually at a good time during the lunar cycle and not too many clouds around. When that day comes, take a photo or remember how your daytime moon looks, and do a drawing. Show and explain your moon to your School Coordinator.

**Make a Mask**  [Up to 2 hours]

Masks come in a great variety of shapes, sizes and themes – and from musical theatre to operating theatres, different masks are used for different reasons! Pick a style of mask you’d like to make – find some cardboard, paper or spare cloth for the face, some colours to decorate, craft scissors to shape and cut, and some elastic or string and other craft materials if required. Show your mask or a photo of it to your School Coordinator.

Summer Activities 2020-2021

**Threatened Species**  [Up to 2 hours]

Did you know there are some animal and plant species at risk of future extinction? To support these vulnerable species, community groups such as [Friends of Fernglade](#) work to raise public awareness. Your challenge is to find out about a threatened species – include 1. Where it usually lives 2. What it eats 3. Size 4. Lifespan [how old it normally lives] 5. What humans can do to help this animal. Make a poster to raise awareness about this species. Show your School Coordinator.

**DIY Christmas Wreath**  [Up to 2 hours]

With Christmas just around the corner, now is a good time to have a go at making your own DIY Christmas Wreath. First, use an old coat hanger, hoop or other object you can bend into a circular shape and fasten. Once you have a circular object, find recycled and/or craft materials to stick on or attach with string or tape. Natural materials from the garden can work well. Take a photo and show your School Coordinator.

Summer Activities 2020-2021

**Wonderful Water**  [Up to 1 hour]

Did you know the human body is over 50% water? It is true – and water is important for the survival and health of life on earth. Find your own way to celebrate water – you can do a photo or picture collage of water, explore your local stream, river or tidal zone, showcase water around your local area, or think up your own idea. Ask your parent first to ensure your plan is safe. Show your work to your School Coordinator.

**What makes you smile?**  [Up to 1 hour]

It’s been a tough year, but people have found ways to do more things that bring happiness and joy 😊 Are there things that you really enjoy, that make you happy? We’d like to hear about what makes you smile. You can draw, create or write something for this activity. Remember to show your School Coordinator too.

Live show on history of coins
That Peter Underwood Centre's interaction, live show is back this week, and the fascinating history of coins will be on the agenda.
University of Tasmania Geographe Lecture, Dr. Charlotte Glencross, will lead the activity about coins version, which will be targeted at Year 6 students, but is open to all.
The broadcast will be determined via Zoom webinar from 3.15pm on Wednesday, December 2, with some prizes to be given.
If you wish to participate, please register by December 1 via the Peter Underwood Centre Facebook page: 
https://www.facebook.com/peterunderwood

HOPE FLIGHT

AUSTRALIA is known as the “land of koalas,” and is lucky enough to be home to the unique and fascinating animals. Usually seen in eucalyptus, often misted, but a bit clumsy, koalas are the No. 1 stars of the world. Unfortunately, some species of koalas are endangered. And orange-bellied, a species traditionally known as COBR, could be the world’s most critically endangered koala species.
This is because the lime-about the same size as a chameleon, lives only in Tasmania, and has a breeding season that occurs to rare events, all koalas in the wilds of eastern Australia. Only 100 breeding animals live in the wild, and last year there were just 25. Following the breeding season, COBR migrate to create Victoria and South Australia for autumn and winter. They are one of only three koala species in the world that migrate. Unfortunately, they have been working hard to save COBR, and might once have a breakthrough. As of last week, 51 birds had arrived at Melbourne, and a few more were expected. The idea is created by volunteers working with the Tasmanian Government’s COBR Management Program. Since 2001, the number of COBR at Melbourne, from 3400 in 2001, has exceeded the number of COBR at Underwood in 2010, with 4000 birds in 2010. The dinner held at the hotel will benefit both the productivity breeding season. But despite the increase in numbers, the COBR population is still challenging. It has been shown that every koala needs to be captured in its habitat, but the use of high-quality habitat is considered a tricky issue. COBR have the following of nocturnal flights near Koala grizzly areas.
