

# Global Logistics and Maritime Management

90 per cent of world trade is sent via the oceans. It takes specialist skills to manage this vast industry.

Global Logistics and Maritime Management professionals are in demand around the world, and their careers extend far beyond the ports.

This specialist business degree will give you high-level expertise and knowledge. Our program will equip you with the ability to maintain, enhance and drive these industries into the future.

You'll also engage directly with leaders from the maritime and logistics industries. As well as learning from highly qualified teaching staff, you'll gain valuable experience with industry workshops and site visits.

## WHAT CAN I STUDY?

### **Logistics and Supply Chain Management**

This major delves into advanced studies in logistics and supply chain management underpinning international trade. You'll gain specialist knowledge across key industry issues with the skills to implement complex supply chain systems. Graduates pursue careers across different industries and sectors such as manufacturing, transport and logistics, mining, defence, agriculture, retail, and government.

### **Maritime Technology Management**

Technology is creating new challenges and opportunities in the maritime industry. This major combines studies in engineering and technology management with maritime business, giving you the expertise to manage complex projects. Career prospects include ship management, operations management, materials handling, ports and terminal management and project management.

### **Maritime Business Management**

This major combines business principles with learning specific to maritime management. Your studies will cover international logistics services and strategies, as well as the structuring, operation and coordination of supply chains. You'll graduate with a specialist skillset, able to pursue careers in sectors such as shipping, chartering, ports and terminals, and freight forwarding.

## CAREER OUTLOOK

Our Global Logistics and Maritime Management degrees prepare students for management and senior administrative careers in private enterprises, industry organisations and governments.

Employment outlook for maritime professionals is growing, with skilled graduates in global demand.

National Employment projections in Marine Transport professionals is expected to grow between now and 2024.

More than 15,000 jobs are expected to be created in Australia as part of the continuous Naval Shipbuilding Program over the next 50 years.

Australian Government Job Outlook, Naval Shipbuilding Careers.

“

The opportunities for research and hands-on learning that the facilities like the model test basin, towing tank and ship simulator provide are unlike anywhere else in Australia.”

– ASHLEIGH JOHNSON,  
BACHELOR OF GLOBAL LOGISTICS  
AND MARITIME MANAGEMENT
