

YOU DON'T NEED A MEDICAL DEGREE TO VALUE CLEAN WATER

TOILETS

Don't use the toilet as a rubbish bin. Every flush can use up to 13 litres of clean water.

Report leaking toilets to campus.services@utas.edu.au. A toilet leak could waste 100–1000 L/day!

TAPS

Turn the bathroom tap off while brushing your teeth or shaving.

Don't let the kitchen tap run while scraping pots or washing vegetables.

WATER FOUNTAIN

Use a refillable bottle.

If drinking directly from the fountain, let the flow stop when pausing for a breath.

SHOWER

Cutting your shower by one minute can save >3,500 L/year! Challenge yourself to shower in less than four minutes!

Keep a bucket in the shower to catch water as it warms up and use the water to flush toilets or to water plants.
