*The Graduate Outcomes Survey (GOS) 2018 is a national survey of Australian higher education graduates and is run on behalf of the Australian Government Department of Education and Training. The GOS collects information about the labour market outcomes and further study activities of graduates 4-6 months after the completion of their course. The results of the research are used to help higher education providers and the government gain insight into graduate destinations. The 2018 GOS was administered to all 2017 graduates.*
